EDUCATION

Institute of Technical Education and Research (ITER) Bhubaneswar, Odisha | 2023 – 2027
B.Tech in Computer Science and Information Technology | CGPA: 7.95/10

Tetrahedron Group of Institutions, Tangi, Cuttack — Higher Secondary (12th) | 79% 2022
Saraswati Shishu Vidya Mandir, Kishore Nagar — Higher School (10th) | 84.6% 2020

EXPERIENCE

Full Stack Development Intern | SentientWare Tech Solutions Pvt. Ltd. **View Experience** Jun 2026 – Aug 2026

- Built and updated web application features across the frontend and backend using React, Node.js, HTML, CSS and JavaScript.
- Debugged frontend and backend issues in existing application workflows.
- Worked with the team through Git version control to merge and deliver feature updates.

Web Developer Intern | TechSonIx Solutions (TSX) Apr 2025

- Built responsive web pages with HTML, CSS and JavaScript during the 4-week TechSonIx Employability Program.
- Added web application features, fixed frontend bugs, and used Git for version control.

PROJECTS

JAN-AI-MITRA — AI Grievance Management System Jun 2025 – Oct 2025

- **Technologies:** React.js | Node.js | Express.js | MongoDB | REST APIs | RAG | Speech-to-Text / Text-to-Speech
- Built a full-stack platform where citizens submit grievances and track their status, with REST APIs protected by authentication and authorization.
- Implemented a RAG pipeline with contextual retrieval so AI responses to grievance-related questions are based on retrieved context.
- Added AI-assisted classification, summarization, priority assessment and department routing to move each grievance from submission to the right department.
- Built a multilingual voice interface using Speech-to-Text and Text-to-Speech, supporting 4 languages.

COSMIC-WATCH — Real-Time Near-Earth Object Monitoring Platform **View Project** Jan 2025

- **Technologies:** React.js | Node.js | Express.js | MongoDB | Socket.IO | NASA NeoWs API | Python (Flask)
- Built a full-stack monitoring app that pulls live Near-Earth Object data from the NASA NeoWs API into a React frontend through a Node.js/Express REST API with MongoDB.
- Used WebSocket/Socket.IO for real-time updates to the dashboards, proximity alerts and data visualizations.
- Added a separate Python (Flask) AI/ML service for NEO risk analysis, which the web application calls through REST APIs.

SECURE API PLATFORM — Backend, DevOps & Monitoring Oct 2026 – Present

- **Technologies:** Node.js | Express.js | Docker | Nginx | Redis | CI/CD | Prometheus | Grafana | OWASP
- Containerized a Node.js/Express REST API with Docker and ran multiple instances behind an Nginx load balancer, with Redis in the setup.
- Secured the API following OWASP guidance: authentication, authorization, input validation, rate limiting, secure HTTP headers and protected environment secrets.
- Set up CI/CD workflows to build and test the service, added health checks and logging, and exported Prometheus metrics to Grafana dashboards.

TECHNICAL SKILLS

Programming Languages: JavaScript, Python, Java
Frontend: HTML, CSS, JavaScript, React.js, Tailwind CSS
Backend: Node.js, Express.js, Flask, REST APIs, JWT, WebSocket/Socket.IO
Databases: MongoDB, MySQL, SQL
AI / ML: RAG, LLM Integration, Speech-to-Text (STT), Text-to-Speech (TTS), Multilingual AI
DevOps & Tools: Git, GitHub, Docker, Nginx, Redis, CI/CD, Prometheus, Grafana
Security: OWASP, Authentication, Authorization, Input Validation, Rate Limiting, Secure API Design
Core Computer Science: DSA, OOP, DBMS, Operating Systems, Computer Networks, Multithreading

CERTIFICATIONS & ACHIEVEMENTS

Certifications: Fortinet Certified Fundamentals (FCF) | Internshala Web Development Training | Advanced Artificial Intelligence Projects with Python (TCS iON) — **View Certificate**

Achievements: 2nd Merit, Hackathon at Centurion University | Participated in Algoverse Hackathon organized with Microsoft, Delhi–Noida — **View Certificate**
